

# INGENIO

The Modern Structural Building Box

**INGENIO**, the system of quick constructing is a new invention in the domain of structural building sets. The various parts are just slid one into another; and within a short time fine models, true to nature, can be constructed without troublesome screwing.

INGENIO structural building sets consist of plates and sliders. The sliders are made in such a manner, that the grooves of the plates can be slid in (fig. 1).

Models of any length can be constructed, most practically under application of the lap-joint (fig. 2).

For the face the face-sliders no. 16 together with the plates nos. 7, 8, 9, 10 or 11 will be applied. The face-sliders will be slid in according to fig. 3. They can be arranged either according to fig. 1 or according to fig. 2.

For engineering-models the perforated plates nos. 2, 5, and 8 as well as the floor-stand no. 12 will be applied. They are joined by means of screws. The wheels will be slightly pressed when put on the axles. A spring locking device will keep the wheels there. On the reverse of this leaflet, please, find a schedule of the INGENIO building parts.

fig. 3

No. 1  
Telefon-  
box

No. 2  
Show-case

No. 3  
Stall

No. 4 Cook-  
ing-range

These models can be built with INGENIO 1, 2 or 3.

No. 5 Writing-table with chair

No. 6 Kitchen-cupboard

No. 7 Fire-place

No. 8 Station-hall

No. 9 Switch-stand

No. 10 Dressing-table

These models can be built with INGENIO 1, 2 or 3.

## No.11 Flat-car

Floor-stand and chassis will be attached to the platform of the carriage. The screws will be slightly tightened.

Side-view of the chassis

Surface of the chassis

## No.12 Truck with the brakeman's cabin

Back-side of the truck

The bottom of the truck, seen from below

## No.13 Luggage-van

View of the chassis which will be screwed to the bottom of the van together with the floor-stand.

These models can be built with INGENIO 2 or 3.

## No. 14 Electric- cart

Chassis

Side-view

Bottom of the truck,  
seen from below

## No. 15 Tram

Bottom of the tram, seen from below

## No. 16 Mine- locomotive

Bottom of the locomotive, seen from below

Chassis as model no. 13

These models can be built with INGENIO 2 or 3.

# No.17 Diesel-locomotive

View of the chassis

Bottom of the locomotive, seen from below

Axes will be fixed in these holes

Bottom plate of the truck

View of the chassis

# No. 18 Truck with trailer

Radiator of the truck  
without lamp-holders

Bottom of the truck, seen from below

These models can be built with **INGENIO 3**.

# No.19 Overland-omnibus

View of the chassis

Bottom of the omnibus, seen from below

This hole serves for fixing the crank

Side-view of the crane-beam

# No.20 Elevating crane

Bottom of the crane-beam, seen from below. When fastening the floor-stand, please, place a perforated plate no.8 over the rectangular plate no.6

Side-view of the crane

These models can be built of INGENIO 3.

## Patterns of the INGENIO-parts

No. 1  
large rectangular plate

No. 2  
large rectangular plate, perforated

No. 3  
square plate

No. 4  
long rectangular plate

No. 5  
long rectangular plate, perforated

No. 6  
long rectangular window

No. 7  
rectangular plate

No. 8  
perforated plate

No. 9  
window

No. 10  
left door

No. 11  
right door

No. 12  
floor-stand

No. 13  
short slider

No. 14  
medium slider

No. 15  
long slider

No. 16  
face-slider

No. 17  
large wheel

No. 18  
small wheel

No. 19  
axle

No. 20  
crank

No. 21  
screw

No. 22  
screw-nut

### Schedule of the parts which are contained in the boxes and used for the various models.
