The World's most Popular Toy

MECCANO

The Original Steel Construction Toy

What it is

Meccano is the original steel construction toy. It has a great variety of parts—in fact, a part for every purpose. There are strong steel strips with holes every half inch to make building easy; solid brass pulleys and gears, couplings for strips and rods, curved strips and many others. All parts are strong and well finished—without rough edges.

What it will do

Meccano will build an infinite variety of models—derricks, bridges, steam shovels, tractors, locomotives, autos—anything you can think of. With every set is included a big book full of pictures of models and full printed instructions are given to show you just how to build the models. Your fun begins as soon as you open your set.

Meccano Outfits

Meccano parts are packed in outfits of varying size. The quality and finish of the parts are of the same high standard throughout the series, but as the outfits increase in size they contain larger quantities and greater varieties of parts. Each outfit is complete with fully illustrated Book of Models; there's nothing further to buy.

No. 1 Meccano Outfit . \$3.00
Complete with big Book of Models

Accessory Outfits

Each outfit can be converted into the next larger by the purchase of the proper accessory outfit. In this way, no matter with what outfit the boy commences, he can build it up by degrees until it equals the largest set made.

Any Boy can build Meccano Models like These

Hand Car

Hammerhead
Crane

Electric Tractor

Punch
Press

Log Saw

High
Speed
Ship
Coaler

MECCANO

Made First—Made Best—Builds Most

Builds Most Models—and Why

Meccano has more kinds of parts than any other toy. True, other toys have copied some Meccano parts, but only Meccano has them all. There has never been a steel construction toy that did not copy some Meccano parts—that's how good Meccano is. Get the original Meccano every time.

Examine the Parts for Yourself

We invite you to be the judge of Meccano parts. Examine the sturdy strips, so well finished—nothing flimsy there. Then examine the brass gears and pulley wheels, with hubs reamed as clean as a whistle. Next inspect the Meccano motor with brass bushed driving shaft and the strong side plates with equi-distant holes for attaching gearing. Meccano has steadily maintained the quality of its goods and the accuracy of their finish and that is why all Meccano models work.

Outfits and Motors

Outfits Nos. 1, 2 and 3 may be purchased either with or without an Electric Motor, and when motors are included the outfits are known as 1x, 2x and 3x, respectively. Outfits Nos. 4, 5 and 6 each contain a motor, and in addition Nos. 5 and 6 include a Meccano Transformer. Of course all the Meccano models can be made to work by hand, but it adds greatly to the fun if they are operated by means of a motor. The Meccano Electric Motor has been especially designed to be built right into the model and form a rigid part of it. It requires only 4 to 6 volts and will run very efficiently on dry cells or direct from the house current through a Meccano transformer. No more satisfactory toy motor has ever been designed.

No. 2x Meccano Outfit . \$8.50

Has a reversing Electric Motor

Price List of Meccano Products

The Meccano Outfits

Each of these outfits is complete with fully illustrated instructions and the only tools necessary—a spanner and screw driver. The fun begins as soon as the outfit is opened.

No. 00 Outfit.....	\$1.00	No. 3 Outfit.....	\$9.00
No. 0 Outfit.....	2.00	No. 3x Outfit.....	11.50
No. 1 Outfit.....	3.00	No. 4 Outfit.....	15.00
No. 1x Outfit.....	5.00	No. 5 Outfit.....	25.00
No. 2 Outfit.....	6.00	No. 6 Outfit.....	45.00
No. 2x Outfit.....	8.50		

Outfits Nos. 1x, 2x, 3x and 4 contain an electric motor;
Nos. 5 and 6 have motor and transformer.

Meccano Motors

E-1 Electric Motor, one-way, with pulley and pinion for belt or gear drive.....	\$3.50
E-2 Electric Motor, reversing, with pulley, pinion and extra gears	4.50
S-1 Clockwork Motor, with start, stop and reverse levers	3.00
Meccano Transformer, for operating Meccano Electric Motors direct from house current. For 110 volts, 60 cycles A. C. only.....	2.50

Meccano Accessory Outfits

These combine the main outfits, converting each one into the next larger. They are not intended for beginner's sets.

No. 0A	Makes a No. 0 into a No. 1.....	\$1.25
No. 1A	Makes a No. 1 into a No. 2.....	3.00
No. 2A	Makes a No. 2 into a No. 3.....	3.00
No. 3A*	Makes a No. 3 into a No. 4.....	6.00
No. 4A†	Makes a No. 4 into a No. 5.....	7.50
No. 5A	Makes a No. 5 into a No. 6.....	20.00

*Except motor. †Except transformer.

Meccano Separate Parts can be purchased at any time and in any quantities from your dealer or direct from us.

"The Meccano Magazine"

There are always new things coming from Meccano Headquarters, and these are announced first in the "Meccano Magazine"—the Meccano boy's own paper. It's full of interesting news that boys like—articles on engines, airplanes, bridges, etc., new models, prize contests, stories, etc. Send 5 cents for a sample copy. Address Meccano Company, Inc., Dept. L, Elizabeth, N. J.

Read what these Boys say about

MECCANO

"I got my first Meccano on my birthday, October 22nd, 1914, and I still have the original Meccano pieces, a lot of new parts and Outfits that I have collected through the years. I have been a Meccano boy for 10 years and will continue another ten years more. *H. G. D., Mechanic Falls, Maine.*

"I am having loads of fun with my Meccano. I got one for Christmas and enjoyed it so much that I got an Accessory Outfit and am spending my hours in joy and fun." *R. R., Reading, Pa.*

"I now have a No. 2x and think it's a dandy. Have lots of fun with it. Have a motor and everything. Just the thing I wanted." *R. I. M., Youngstown, Ohio.*

"I have been using Meccano since I was five years old and I am now 15. I expect to enter college in September but this will not interfere with my use of Meccano." *D. S., Richmond, Va.*

"I have been an enthusiastic Meccano boy for ten years, and my enthusiasm shows no sign of decrease." *M. J. G., Oil City, Pa.*

Parents and Engineers endorse it, too

"I am enclosing an order for parts for my little son's set. This set was begun for our oldest boy who is now a medical student, and it has the same fascination for the next boy and will no doubt be equally enjoyed by our third little boy in time." *Mrs. E. H. M., Hampton, Iowa.*

"My little boy of ten is delicate and his greatest pleasure is in Meccano which he has loved since he was six and has grown quite proficient in." *Mrs. H. McB., Stockbridge, Mass.*

"My boy is having a lot of enjoyment out of his set, and I think it is doing him a lot of good." *J. P. B., Philadelphia, Pa.*

"I am not a boy but an established engineer with one of the largest electrical corporations and purchased this set (a No. 6) for my own amusement and instruction. I enjoy making the models very much and intend to build them all including the special ones." *F. E. F., Somerville, N. J.*

"I think you have the best thing ever made for a boy. I have had 25 years experience ship building from small submarines to battleships and I think every mechanical and structural principle can be worked out in Meccano." *E. O. C., New York City.*

MECCANO

Fun that never ends
