

All about **TUPO** and what he can do as
acrobat and quick-change artist.

Dear Friend!

No doubt, you have already constructed fine machinery, locomotives, airplanes and also receiving sets, and you have done it with much skill and patience, but you have never before assembled arms and legs, feet and hands, heads with real noses, mouths, eyes, to get a movable man.

And how movable this Tupo Man is! You never saw the like!

Can **you** look at your own back?

Can **you** take your legs under your arms?

Try it!

Tupo can do it and many other things, that is why he is called the serpent man.

Have you ever seen a living serpent man in a circus? Was it not astounding to watch what he could do? And yet, he is only a beginner as compared to Tupo, the serpent man.

After you have finished assembling and checking the joints for correct tightness let your Tupo do some exercises.

Do you know the meaning of "Drill"? You are not yet a soldier, but you know the orders:

Attention!
Stand
at Ease!

You also learnt a number of exercises in the gymnasium. Tupo can do them! You will not cease to wonder and you will soon be able to teach him more "tricks" than I could enumerate.

*

*

*

Your Tupo is really a marvellous man!
He is also a **quick-change artist.**

This tennis player changes into a

Skier

This violinist becomes suddenly . . .

Here he gives a fine imitation of Tom Mix.

Tupo has many accomplishments, but golf does not seem to be one of them.

a fine waiter who serves with skill appetizing dishes.

Here is a list of the changes which you can effect.

There are 3 different Construction Boxes: A B C.

Construction Box A contains:

- one black suit with long trousers
- one blue suit with long trousers
- one sports suit, brown trousers, yellow jacket
- one sports suit, brown trousers, green jacket

and you can dress your Tupo as:

- | | |
|-----------------------------|--|
| <i>waiter</i> | <i>with tray</i> |
| <i>gentleman</i> | <i>with top hat</i> |
| <i>violinist</i> | <i>with violin</i> |
| <i>pianist</i> | |
| <i>bandmaster</i> | <i>with batton</i> |
| <i>cellist</i> | <i>with cello</i> |
| <i>skier</i> | <i>on skis wearing cap</i> |
| <i>sailor in blue dress</i> | <i>with white collar and cap</i> |
| <i>golfer</i> | <i>with cap and driver</i> |
| <i>hunter</i> | <i>with hat and gun</i> |
| <i>Tom Mix</i> | <i>with large wide-brimmed hat and six-shooter</i> |

and so on. There is no limit to your imagination.

Construction Box B contains:

- one black suit with long trousers
- one blue suit with long trousers
- one white suit with long trousers
- one white sports suit with long trousers

to make e. g. the following changes:

- | | |
|------------------------------|----------------------------------|
| <i>waiter</i> | <i>with tray</i> |
| <i>gentleman</i> | <i>with top hat</i> |
| <i>violinist</i> | <i>with violin</i> |
| <i>pianist</i> | |
| <i>bandmaster</i> | <i>with batton</i> |
| <i>cellist</i> | <i>with cello</i> |
| <i>skier</i> | <i>with cap on skis</i> |
| <i>skater</i> | <i>with cap and skates</i> |
| <i>sailor in white dress</i> | <i>with cap and blue collar</i> |
| <i>sailor in blue dress</i> | <i>with cap and white collar</i> |
| <i>tennis player</i> | <i>with racquet</i> |
| <i>cook</i> | <i>with cap</i> |
| <i>athlete</i> | |

and now think what else you could do.

Construction Box C contains:

- one white suit with long trousers
- one pull-over with long white trousers
- one brown sports suit with yellow jacket
- one brown sports suit with green jacket

and you can dress a:

- | | |
|------------------------------|--|
| <i>tennis player</i> | <i>with racquet</i> |
| <i>cook</i> | <i>with cap</i> |
| <i>sailor in white dress</i> | <i>with cap and blue collar</i> |
| <i>hockey player</i> | <i>with cap and hockey stick</i> |
| <i>athlete</i> | |
| <i>golfer</i> | <i>with cap and driver</i> |
| <i>hunter</i> | <i>with hat and gun</i> |
| <i>Tom Mix</i> | <i>with large wide-brimmed hat and six-shooter</i> |

and any combination of **your** own invention.

The making of hats, caps, drivers and other "requisites" is not difficult. The Tupo Uncle has drawn everything on special sheets. Follow very carefully the instructions how to make these things with success.

These are fine pictures!
 Wouldn't you like to arrange
 similar scenes? Well, did I
 guess your thoughts?

It is not so difficult, you will
 afford it from your pocket
 money now and then. There
 are special supplementary boxes
 containing head parts, hands,
 joints etc. and other boxes
 containing flat parts such as
 arms, legs, trunk parts etc.

Already the first supplement opens numerous new possibilities and when you possess the second and third! For birthday or Xmas, or when your uncle comes visiting, you will have but **one** wish: another Tupo supplement! Do not forget it!

No, you are sure not to forget it, you like this training crew and their coxwain too well. They have outrun their opponent by several boat-lengths, they are out of view altogether. See also how simple it is to construct that boat.

On the two previous Pages I showed you various groups. Combinations of this description you can make, of course, only gradually after getting another supplementary box I or supplementary card II. Wish for one, whenever you have an opportunity. – Further, everything must be learnt, practice only makes perfect. The construction of e. g. a toboggan requires thought and some skill.

But when you own a number of self-made requisites your efforts will be well rewarded by the pleasure you and others find with the Tupo Man.

I, for my part, wish you much pleasure with your work and play.

The Tupo Uncle.
